Maharsh Solanki

Java Full Stack Developer | Spring Boot | React.js

Nadiad, Gujarat, India | solankimaharsh787@gmail.com | +91-9313367891
Portfolio: maharsh.me | GitHub: maharsh-tech | LinkedIn: maharsh-solanki

Career Objective

Third-year B.Tech IT student focused on Java and Spring Boot, with a Python development internship at Synent Technologies and full-stack projects using Spring Boot, React.js, PostgreSQL, and Node.js. Seeking a Java or full-stack development internship to contribute RESTful API, database design, and backend development skills.

Internship Experience

Python Development Intern | Synent Technologies Pvt. Ltd. 05/2026 – 06/2026

- Developed a full-stack Task Management web application using Flask, SQLite, Jinja2, HTML, CSS, and JavaScript, supporting task creation, editing, deletion, status updates, and filtering.
- Implemented user authentication with Flask-Login and RESTful API endpoints, validated them with Postman, and deployed the application on a VPS using Git and GitHub.

Projects

FalixMovies | *React.js, FastAPI, MongoDB, Object Storage, Pyrogram* | Live | GitHub

- Deployed a full-stack movie browsing and streaming platform on cloud with a React.js frontend, FastAPI RESTful API backend, and MongoDB database.
- Architected a cloud content pipeline using Object cloud storage for media retrieval, search, and session management.

ServEase | *Java, Spring Boot, React.js, PostgreSQL, Firebase Authentication* | GitHub

- Engineered a full-stack service marketplace in Java with a Spring Boot backend and React.js frontend, connecting users with domestic help providers.
- Built Spring Boot RESTful APIs for service booking workflows and integrated Firebase Authentication for secure user onboarding.
- Modeled a normalized PostgreSQL relational schema (SQL) for service listings, provider profiles, bookings, and user verification records.

HRMS Portal | *React.js, Node.js, Express.js, MongoDB (MERN Stack)* | Live | GitHub

- Delivered a centralized HR management system on the MERN stack with role-based access control (RBAC), real-time attendance logging, and admin dashboards for workforce oversight.
- Automated employee onboarding and HR workflows to reduce manual data entry across departments.

AskOrg AI | *React.js, FastAPI, Python, ChromaDB* | GitHub

- Created an AI-powered enterprise assistant for document search and meeting insights, with a FastAPI backend and ChromaDB vector database.

Technical Skills

Languages: Java, Python, JavaScript, C, C++, SQL

Backend: Spring Boot, RESTful APIs, Firebase Authentication, Node.js, Express.js, Flask, FastAPI

Frontend: React.js, HTML5, CSS3

Cloud and Databases: Amazon Web Services (AWS: EC2, S3, Lambda), Microsoft Azure, PostgreSQL, MySQL, MongoDB, SQLite

Tools: Git, GitHub, Postman, VPS Deployment, Vercel, Netlify

Education

B.Tech in Information Technology | Charusat University, Anand, Gujarat | CGPA: [7.49] *Expected 2028*

Higher Secondary Certificate (HSC), Science | Unique School of Science, Nadiad, Gujarat *2024*

Secondary School Certificate (SSC) | Unique School of Science, Nadiad, Gujarat *2022*
