Profile Summary

Full-stack and cloud-focused 2nd year B.Tech IT student at Charusat University with hands-on experience building scalable web applications, REST APIs, and AI-powered systems on AWS. Proficient in React.js, FastAPI, Node.js, and AWS (EC2, S3, Lambda). Passionate about cloud-native application development, serverless architecture, and integrating AI into production-grade platforms.

Technical Skills

Languages: C, C++, Java, Python, JavaScript, Node.js	Frontend: React.js, HTML5, CSS3
Backend: FastAPI, Spring Boot, REST APIs, Firebase Auth	Cloud: AWS (EC2, S3, Lambda), Microsoft Azure
Databases: MongoDB, PostgreSQL, MySQL	AI/ML: RAG, LLM Integration
Tools: Git, GitHub, Postman, PyroGram, Vercel, Netlify	

Projects

FalixMovies [Featured] | *React, FastAPI, MongoDB, AWS, PyroGram* | 🌐 Live 🐙 GitHub

- Built a full-stack movie browsing and streaming platform deployed on AWS, capable of handling rich media and high-volume user interactions at scale.
- Designed cloud-based content pipeline using AWS S3 and PyroGram for streaming; built FastAPI backend with optimized REST endpoints for media retrieval, search, and session management.

AskOrg AI | *React, FastAPI, Python, ChromaDB, RAG* | 🐙 GitHub

- Developed an AI-powered enterprise assistant for intelligent document retrieval and extraction of actionable insights from recorded meetings.
- Built a Retrieval-Augmented Generation (RAG) pipeline with ChromaDB as the vector store and FastAPI as the backend, centralizing organizational knowledge into a searchable system.

RAG API with FastAPI | *Python, FastAPI, ChromaDB, LLMs, Vector Search* | 🌐 Live 🐙 GitHub

- Production-ready REST API enabling natural language Q&A over user-uploaded documents using local large language models and ChromaDB vector search.
- Engineered document ingestion, chunking, and embedding pipeline; authored complete developer documentation covering setup, API reference, and integration examples.

ServEase | *React, Java, Spring Boot, PostgreSQL, Firebase Auth* | 🐙 GitHub

- Full-stack service marketplace connecting users with domestic help providers, featuring Firebase Auth for secure onboarding and Spring Boot REST APIs for service booking workflows.
- Designed a normalized PostgreSQL schema to efficiently manage service listings, provider profiles, bookings, and user verification records.

HRMS Portal | *React, Node.js, Express.js, MongoDB (MERN)* | 🌐 Live 🐙 GitHub

- Centralized HR management system built on the MERN stack with role-based access control, real-time attendance logging, and admin dashboards for workforce oversight.
- Automated employee onboarding and HR workflows, reducing manual data entry and improving operational efficiency across departments.

Education

Charusat University, Anand, Gujarat

B.Tech in Information Technology [2nd Year – Currently Pursuing]

2024 – Present

Unique School of Science, Nadiad, Gujarat

Higher Secondary Certificate (HSC) – Science Stream

2022 – 2024

Unique School of Science, Nadiad, Gujarat

Secondary School Certificate (SSC)

Completed 2022
